| <b>Inspection details</b>                  | <p>A harvest inspection was carried out on this 2008 Research and Development potato trial, managed under consent 06/R42/01.</p> <p>The inspection included checks on the method used to harvest the crop, the efficacy of the harvesting operation, the protocols in place for cleaning equipment, general record keeping, and arrangements for transport of the harvested material. All were found to be in accordance with the consent conditions.</p> |
| <b>Report conclusions</b>                  | The GM Inspectorate is content that the release is consistent with the conditions of the consent and did not identify any risks to human health or the environment posed by the GMO.                                                                                                                                                                                                                                                                      |
